- Removes heavy build up
- Acid strengthened

ECOZYME BASED PRODUCTS

ENVIRO BEADS

- The inert Gel based Slow Release product is named and trademarked as EnviroBeads .
- We make up a special blend for our trademarked brand “Smellaway” – a retail-based product focussed on grey water remediation for domestic installations, Fat traps and Septic Tanks.
- We package this product in netting bags for slow release applications.
- The remnants are easily removed.
- These can be placed in all fat traps.

URINAL BEADS

- Urinal beads is a natural odour reducer and organic waste digester.
- This product assists in preventing pipe or septic tank clogging and is effective in both waterless and flushing urinals.
- Normally Companies use Sanitizers/sprays to reduce the odour, the microbes in the Urinal Beads absorbs the gas, which treats the cause of the smell and prevents uric acid build up.

CONSUMABLES:
